

Reference project Energy Technology
Brewery
CuChi Brewery, Sabeco, Vietnam

**Project description**

Develop the energy supply for a brewery (4 Mio hl/year) in Vietnam including water preparation, transformers – medium voltage – low voltage power distribution. Connecting NSHVs using 4000A bus bars, S7-control including measuring systems for every dispatch and handing over data to the breweries factory master control system, automatic generator mode in case of mains power failure.

Technical components

- 4 Oil-transformer 2500kVA
- 1 Oils-transformer 500kVA
- 2 Medium voltage switchgear SM6
- 43 Okken-fields 4000A
- 5 Compensation-plant REAC
- 170m bus bar 4000A

Employer

Krones AG
Plant Steinecker

Completion

December 2007

Development and execution

Elektro Stoll GmbH
